

## Baesa boosts document management productivity with SoftExpert solution

Baesa, the company responsible for constructing the Barra Grande Hydroelectric Power Plant, sought a tool for the online management of its documents, projects and plants. By installing the SoftExpert solution, it was possible to standardize and organize the archive based on pre-defined rules. "The existence of a field and administrative office in different places required a solution that could streamline processes and paperwork electronically," said Pâmela Tamanini, responsible for the Baesa archive.

Another prerequisite when choosing the tool was the possibility of online document access. "With the SoftExpert solution, we boosted our document management productivity, observed primarily in the easy and efficient document location, recovery and control," said Tamanini. She further reinforced that the tool maintains the documentation generated during the process in a secure and centralized fashion so that it can be accessed by users both inside and outside the company. "SoftExpert offers a customized solution that meets Baesa's specific needs and allows for future expansions due to the module integration capacity."

### About Baesa

The construction of the Barra Grande Hydroelectric Power Plan was what motivated the some companies to form BAESA in 2001. The shareholders of the venture developed 26 products designed to effectively promote local socioeconomic development, environmental preservation and the recovery of the regional history and culture. The activities include everything from the relocation of families to the management and protection of the flora and fauna, including infrastructure projects and services.

### About [SoftExpert](#)

SoftExpert is the global leader in the field of excellence and compliance management software. More than 1,500 companies worldwide trust SoftExpert's solutions to streamline their work processes, simplify tasks and manage information.
