

Data Traffic Improves Management and Promotes the Integration of its Units with SE Suite

The objective of improving project management for new product creations and monitoring the organization's strategic performance prompted Data Traffic, a traffic and transit data management company, to adopt SoftExpert Excellence Suite. Production Coordinator of Data Traffic, Mara Macedo, cites the mapping and automation of critical processes and the electronic management and maintenance of transit control equipment as some of the main benefits offered by the solution.

Certified with the ISO 9001 Standard, Data Traffic sought a solution that would facilitate the control of quality system documents and give the company's head office and branches the same benefits in terms of system use. "The solution allows the user to control quality management documents and maximize the dissemination and access of the same for the branches, allowing for strategic project management, including the monitoring of phases facilitated by online access," said Macedo.

The SE Suite allows Data Traffic to achieve results and data analysis through integration performed by the system itself by means of a range of different modules that connect the information. "The diversification of modules that serve the different areas of the company and their integration with the Quality Management System is a differential provided by SoftExpert compared to the other solutions available on the market," said Macedo.

About Data Traffic

Operating in the market for the past 12 years, Data Traffic offers its clients an extensive line of data management products and services designed for traffic and transit. Headquartered in Goiânia, capital city of the Brazilian state of Goiás, the company allows clients in the 16 states where it operates to cross and store elements originating from different databases while allowing for integration with the national transit system. Data Traffic maintains partnerships with several different national and international companies, improving its service offer, equipment supply and system development by operating intelligent transit, traffic, transport and security management control systems.

About SoftExpert

SoftExpert is the global leader in the field of excellence and compliance management software. More than 1,500 companies worldwide trust SoftExpert's solutions to streamline their work processes, simplify tasks and manage information. Developed for any type of business in a wide range of industries, SoftExpert solutions help reduce costs, minimize risk, improve performance, and gain the flexibility to respond to changing business needs.
