***Petroquímica Suape* migrates to SE Suite and boosts solution performance**

High Lights

www.petroquimicasuape.com.br

Production Capacity

640,000 tons of PTA per year

Total Investment in Complex

R\$ 4 billion

Jobs during the

Construction Phase

5,300 (at the peak of work)

Jobs during the Operation

1,800 direct jobs (company and third party)

Start of Operation

Second half of 2010

Petroquímica Suape uses the SoftExpert EDMS (Engineering Document Management System) System, an integral part of SoftExpert ECM Suite. Now, with the SE Suite 1.1 version available, the customer can migrate to the new system focused on the continuous improvement of internal processes. For Robson Tavares, technical archivist, the gains in productivity generated by SE Suite are quite clear, primarily due to the boosted task processing speed in the system. "The layout also evolved compared to the previous system. Now the screens are also more user friendly, the icons more intuitive and standardized, and the path for reaching certain system areas was reduced, eliminating the need for several clicks," said Tavares.

"The migration to SE Suite was performed by specialized SoftExpert professionals, who followed the stages necessary to ensure the project's success," said Tavares. "It was an easy and fast process. In one weekend, SoftExpert completed the migration successfully and within the previously established deadline. We are satisfied with the process and with the evolution we saw in the system."

The SoftExpert ECM Suite solution, which is focused on EDMS, allows *Petroquímica Suape* to manage the design modification and creation requests within the system itself due to the integration with the CAD systems. It also allows users to define and use a standard template for project documents and view documents in their original format, among other possibilities.

▶ MAIN ADVANTAGES OF USING SE ECM SUITE

- Boosted productivity of electronic document management.
- Users can maintain a historical of all document versions/updates.
- Elimination of non-updated document copies.
- Compliance with the regulations adopted by the company.
- Reduced need for printouts and paper use.
- Reduced project starting time.
- Streamlined activity completion.
- Use of updated materials.

“ The layout of SE Suite evolved in comparison to the previous system and the gains in productivity are quite clear, primarily due to the increased speed of task processing in the system. Now the screens are also more user friendly, the icons more intuitive and standardized, and the path for reaching certain system areas was reduced, eliminating the need for several clicks. We are satisfied with the migration, completed within the established deadline, and with the evolution we saw in the system.

▶ ABOUT PETROQUÍMICA SUAPE

Companhia Petroquímica de Pernambuco (Petroquímica Suape) is a venture led by *Petrobras Química S.A. (Petroquisa)* to install the Suape Petrochemical Complex, which includes three integrated industrial units: one for the production of terephthalic acid (PTA), another to produce polymers and polyester threads (formerly Citepe) and a third, which will manufacture resin for PET packaging. When in operation, *Petroquímica Suape* will be structuring the most important integrated polyester pole in Latin America at the Suape Industrial Port Complex. The choice of cutting-edge technologies, a production scale that matches that of the world's largest industries and the integration of industrial units constitute some of the competitive differentials of *Petroquímica Suape*, which will start operating the three plants during the second half of 2010.

▶ ABOUT SOFTEXPERT

SoftExpert is the leading global provider of software solutions for compliance and business excellence. The company is present in over 25 countries on the five continents, and has a portfolio of more than 1,700 customers. The SoftExpert Excellence Suite (SE Suite) offers a set of multilingual modules that are natively integrated and fully Web-based to automate the processes required to improve and optimize the different business areas at organizations, boosting quality of management, cutting operating costs and facilitating compliance with the main market standards and regulations. SE Suite also complements and optimizes Enterprise Resource Planning systems. The suite is integrated with the main ERP systems on the market through already available connectors, or through customized connectors developed based on the client's specific needs.
