

Suatrans Foresees Higher Return with the Implementation of SoftExpert

The need to acquire an IT solution during its restructuring phase led *Suatrans*, a company responsible for the control and prevention of environmental accidents, to opt for the implementation of SoftExpert solution. Quality Analyst at the company, Luis Henrique Dalaneze, commented that the main expectation for the system is the guaranteed ease and efficiency of the activities undertaken by the company, providing graphics per non-compliance and decentralizing the entry of corrective actions. "We believe that we will achieve profitable and satisfactory results by implementing the software," said Dalaneze.

Suatrans also hopes to facilitate access to information on the treatment of non-conformities, since the previous system made it difficult to obtain information considered crucial for the decision making process. "The international presence of SoftExpert, which supplies its solutions and services for major global brands, was a key point when choosing the company," he said.

About Suatrans

With operations focused on offering emergency assistance for the leakage of hazardous products, *Suatrans* developed an environmental accident control and prevention system. Since 1989, the company has offered its clients environmental service solutions, training and products for the environment, maintaining internationally recognized quality standards. Certified by the ISO 9001, ISO 14001 and OHSAS 18001, *Suatrans* benefits from the use of modern equipment, high quality services, renowned professionals and state-of-the-art products.
